About me

Hello, my name is Filip (25). Currently I am a senior student of graphics and multimedia. I am looking to gain my first professional experience and get an opportunity to learn new things.

Because of the experience I had from previous jobs I learned how to handle pressure in different situations, work well in a team environment and I developed a high sense for responsibility. Overall it helped me get through my education and grow as a human.

While I was studying I approached all of my projects, both personal and University related, as if they were projects for clients. I took care of my assignments with maximum responsibility and was always able to prioritize my tasks.

Tools

Personal skills
